

Music Streaming App

Introduction

Project Name: Music Streaming App

Goal: The goal is to offer users a simple and enjoyable way to stream and discover music. It focuses on smooth navigation and an interactive listening experience.

Role: UX/UI Designer and Developer

Tools Used: Figma, Adobe XD Team

Members:

1. Arunkumar T
2. Shalini S
3. Preethi R
4. Navaneetham V 5. Pradhish R

Problem Statement

Many users find existing music apps complex and cluttered. This project aims to create a simpler and more intuitive platform that offers easy navigation, smooth streaming, and personalized recommendations.

User Research

User research included music listeners across different age groups. Key insights:

- Users prefer minimal layouts and fast access to playlists.
- Personalized music suggestions increase engagement.
- Offline play and smooth playback are essential.

Information Architecture

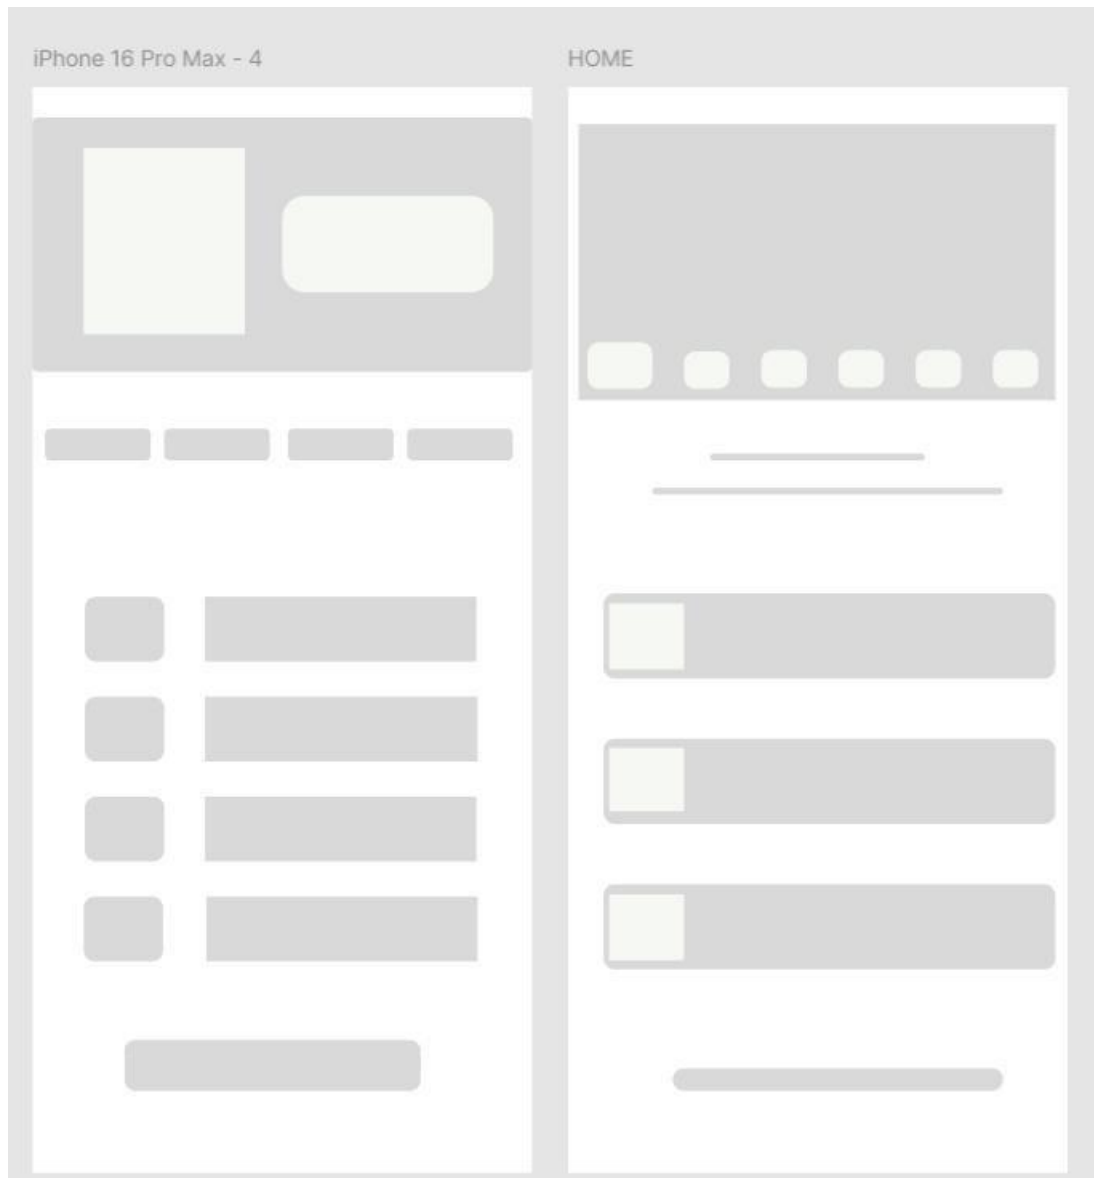

1. Home (Recommended tracks)
2. Search (Artists, Albums, Genres)
3. Library (User playlists)
4. Player (Now playing)
5. Profile (Settings & preferences)

User Flow / Journey

Start: User opens app → Explore songs → Play track → Add to playlist → End: Enjoys personalized music feed.

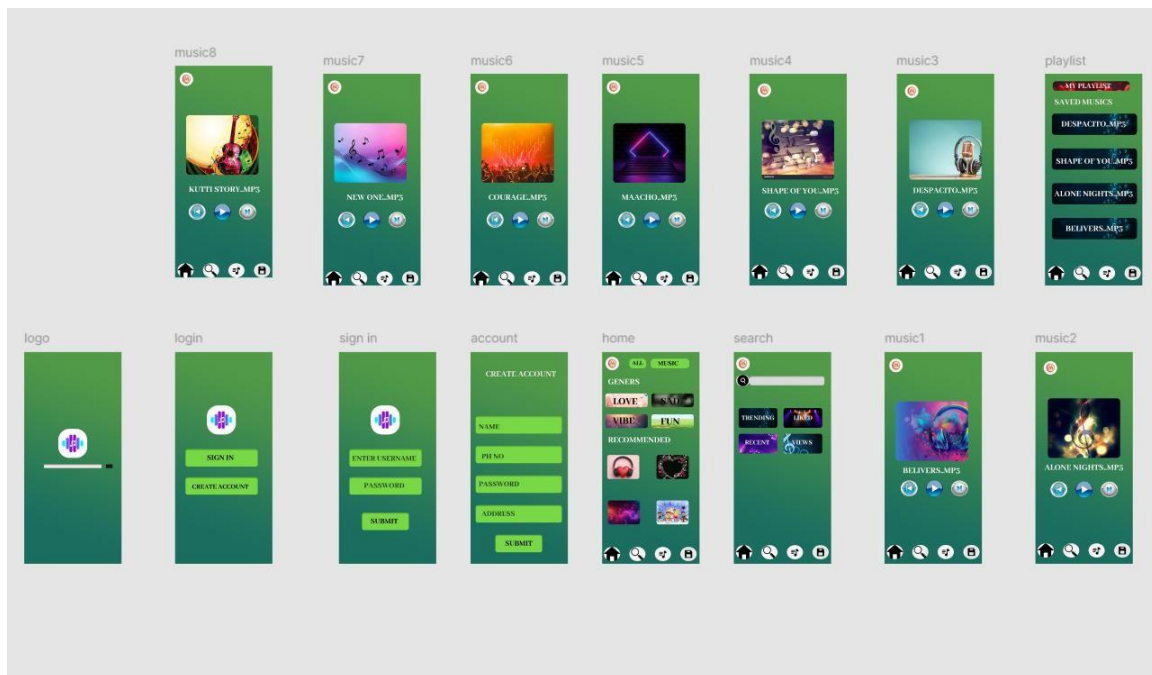

Wireframe

Low-fidelity wireframes were created in Figma to design the layout with focus on simplicity, music control visibility, and smooth navigation.

UI Design

The UI design of the Music Streaming App focuses on a clean and immersive music experience with a dark theme to highlight album art and controls. Rounded icons, smooth gradients, and intuitive navigation ensure users can easily explore playlists, trending songs, and personalized recommendations. The interface balances visuals and functionality, offering seamless playback and interactive user engagement.

Prototype & Interactions

High-fidelity prototype included tap transitions, swipe gestures for playlists, and visual feedback for play/pause interactions.

Conclusion

The Music Streaming App delivers a smooth, modern, and interactive experience, allowing users to enjoy their favorite music easily through Figma's intuitive design process.
